# IRB SEVENS WORLD SERIES 2006/07 

IRB GAME ANALYSIS
March 2007

This is a report on the San Diego, USA, 2007 IRB Sevens tournament.
It comprises an analysis of all elements of play together with the approach to, and performance of, all participating teams in various aspects of the game.

The report looks at such areas as

- Scoring and the effectiveness of each team in attack and defence
- The source and origin of tries
- The effectiveness of teams in retaining possession
- Each country's passes and rate of passing
- Each country's second phases and rate of second phase play
- The number and nature of tackles made by each team
- Each team's approach and success at the breakdown
- Each country's performance on its own restarts
- Plus data on scrums, lineouts, penalties, referees and temporary suspensions.

Similar reports will be prepared on each leg of the IRB Sevens series. These reports will then be sent to all participating teams before the start of the next group of events.

At the end of the 2006/2007 IRB Sevens World Series, a comprehensive report, bringing together the data collected throughout the series, will then be produced and distributed to all member countries of the International Rugby Board.

|  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |

| PENALTIES awarded at breakdown (\%) | 54\% | 52\% |
| YELLOW CARDS (total) | 16 | 15 |

## IRB SEVENS WORLD SERIES - SAN DIEGO 2007 STATISTICAL SUMMARY

## SCORING POINTS

The average number of points scored in a game was 34 (2006-40) - with the highest number of points in a game being 62 - Fiji v Scotland and Fiji v West Indies and the least 17 - Australia v France and USA v West Indies

The average number of point scored by a team was 17 but, not surprisingly, there were major variations around this average. Fiji, for example, averaged 36 points per game while West Indies managed just 3. The average for each competing team was as follows:

AVERAGE POINTS SCORED PER TEAM PER GAME

|  | Fiji <br> Samoa | Matches | 2007 | 2006 |
| :---: | :---: | :---: | :---: | :---: |
|  |  | 6 | 36* | 24* |
|  |  | 6 | $28^{*}$ | 32 |
|  | New Zealand | 5 | 26 | 33 |
| 3 | South Africa USA | 6 | 23 | 29 |
| (0) |  | 6 | 18 | 12 |
|  | Tonga | 6 | 18 | 30 |
| (2) | England | 5 | 17 | 32* |
| 2 | Argentina | 6 | 17 | 21 |
|  | Kenya <br> Scotland | 5 | 15 | 19 |
| 8) |  | 6 | 15 | 16 |
| 5 | Australia | 5 | 15 | 21 |
| ct | Canada | 5 | 13 | 23 |
| (6) | Portugal | 6 | 13 | n/a |
|  | France | 5 | 12 | 18 |
|  | Chile West Indies | 5 | 10 | n/a |
|  |  | 5 | 3 | 2 |
|  |  | inc 20min final |  |  |

The figures show the average number of points scored. The figures do not show, however, how effective each team was in scoring points in relation to the possession that it obtained. A team may, for example, obtain little possession but still manage to score a significant number of tries. The
following paragraph considers this and attempts to show how successful each team was in converting possession into tries.

This was done by adding together the time each team was in possession of the ball in all the matches it played and then dividing it by the number of tries scored. The result then gave a rate of try scoring. As an illustration of this, Kenya scored one try for every 75 seconds possession.

The following table gives the relevant figure for each participating team:
RATE OF TRY SCORING

|  |  | Matches | 2007 | 2006 |
| :---: | :---: | :---: | :---: | :---: |
|  | Fiji | 6 | 1 try scored every 38secs | 1 try scored every 42secs |
|  | Samoa | 6 | 43 | 52 |
|  | New Zealand | 5 | 50 | 44 |
| 93 | South Africa | 6 | 64 | 38 |
| \% | Argentina | 6 | 69 | 48 |
| $0$ | Tonga | 6 | 75 | 45 |
|  | Kenya | 5 | 75 | 75 |
| (6) | Scotland | 6 | 78 | 104 |
| 歧 | England | 5 | 89 | 53 |
| (6) | Australia | 5 | 95 | 67 |
| (6) | USA | 6 | 95 | 105 |
| 1 | Chile | 5 | 96 | n/a |
| , | Canada | 5 | 103 | 54 |
| (1) | Portugal | 6 | 110 | n/a |
| TV | France | 5 | 138 | 79 |
| (2) | West Indies | 5 | 259 | 351 |

The table shows that on a rate of try scoring, the top four are the same but with a slight change with the bottom four. Not all teams therefore maintained an identical position to that shown in the first table.

## CONCEDING POINTS

average number of point conceded by a team was 17 but, just as in points scored, there were major variations around this average. New Zealand, for example, conceded 10 points per game while Chile conceded 32. The average for each competing team was as follows:

AVERAGE POINTS CONCEDED PER TEAM PER GAME

The figures show the average number of points conceded. The figures do not show, however, how effective each team was in restricting points in relation to the possession that their opponents obtained. A team may, for example, concede very few tries in the face of considerable opposition possession. The following paragraph attempts to give some sort of measurement to this by illustrating how successful each team was in preventing their opposition from converting possession into tries.

This was done by adding together the total time the team's opponents were in possession of the ball - and then dividing it by the number of tries conceded. The result then gave a rate of try scoring by the opposition. As an illustration of this, Australia conceded a try for every 96 seconds possession obtained by their opponents.

The following table gives the relevant figure for each participating team.
RATE OF TRY CONCEDING

|  |  | Matches | 2007 | 2006 |
| :---: | :---: | :---: | :---: | :---: |
|  | New Zealand | 5 | 1 try conceded every 145 secs | 1 try conceded every 83 secs |
|  | Samoa | 6 | 110 | 91 |
|  | South Africa | 6 | 101 | 113 |
|  | Fiji | 6 | 102 | 103 |
|  | Argentina | 6 | 98 | 124 |
|  | Australia | 5 | 96 | 81 |
| $\Leftrightarrow$ | USA | 6 | 90 | 64 |
|  | Tonga | 6 | 85 | 67 |
| (1) | England | 5 | 78 | 114 |
|  | Canada | 5 | 74 | 69 |
|  | France | 5 | 74 | 67 |
|  | Kenya | 5 | 68 | 88 |
|  | Portugal | 6 | 57 | n/a |
| 18 | Scotland | 6 | 50 | 45 |
|  | Chile | 5 | 49 | n/a |
|  | West Indies | 5 | 40 | 36 |

## OTHER SCORING

There were 253 tries scored in the tournament making an average of 5.7 per game (2006-6.0). No penalty goals were kicked and there were no drop goals.

The conversion success rate was 59\% (2006-62\%).

The conversion success rates from various parts of the pitch are shown:

While the participating teams had conversion success rates either side of this figure, it was interesting to note that there were noticeable variations in the percentage success rate of those teams scoring more than 18 tries as shown below:

## CONVERSION SUCCESS RATES

West Indies and Chile had the lowest success rate of all 16 participating teams at $33 \%$.

Nevertheless, because of the relatively few tries scored, applying percentages can, at this stage, only be regarded as indicative. In addition, the location of the score can be a significant factor in achieving a successful conversion. As the sevens series develops, however, and tries accumulate, it will be possible to produce, at the end of the year, a more meaningful comparison of each team's cumulative conversion hit rate.

## IMPACT OF TRIES

With no penalty goals, not one drop goal and a conversion success rate of $59 \%$, it was inevitable that tries would determine the winning team in the vast majority of cases - and this proved to be the case.

Of the 44 matches, 43 (or $98 \%$ ) were won by the team scoring the most tries. 1 matches were won because of conversions where the tries were equal.

## SOURCE OF TRIES

There were 253 tries scored in the 44 matches. The following tables show

1. The possession source that resulted in tries
2. Where tries were scored
3. Where on the pitch the lead up to the try started
4. The build up to all tries

## 1. Possession source

The teams scoring the tries obtained possession of the ball prior to the scoring of the try from a variety of sources. This is shown in the following table:

The above indicates that - overall - teams score around a third of their tries through penalties and free kicks. This was not always the case however:

- 11 of Tonga's 19 tries came from penalties and free kicks
- this contrasted with Argentina's 4 out of 18
- not one of USA tries came from the set pieces of scrum and lineout
- only 12 tries came from regained 50 m restarts -7 came from Fiji. No other team had more than 1.

## 2. Position where tries were scored

Of all the tries scored,
$35 \%$ were scored under the posts
20\% within 15 metres of the left corner flag
$\mathbf{2 5 \%}$ within 15 metres of the right corner flag
The remaining $\mathbf{2 0 \%}$ were scored in-field either side of the posts.

## 3. Origin of tries

Tries originate from various parts of the pitch. The following paragraph shows where the attacking team obtained possession from which they eventually scored
$26 \%$ originated within the 22 metre line $26 \%$ between the 22 and 10 metre line
$8 \%$ between 10 metres and halfway and $40 \%$ originated in the scoring team's half

Individual teams varied from these percentages as shown below.

ORIGIN OF TRIES SCORED (\%)

Fiji

| Own Half | $\begin{gathered} \mathrm{HW} \text { - } \\ 10 \mathrm{~m} \end{gathered}$ | $\begin{gathered} 10 \mathrm{~m}- \\ 22 \mathrm{~m} \end{gathered}$ | Try line | Total Tries |
| :---: | :---: | :---: | :---: | :---: |
| 12 | 1 | 10 | 11 | 34 |
| 10 | 2 | 9 | 7 | 28 |
| 10 | 3 | 6 | 2 | 21 |
| 10 | 1 | 5 | 4 | 20 |
| 3 | 1 | 6 | 9 | 19 |
| 7 | 2 | 6 | 3 | 18 |
| 9 | 0 | 3 | 5 | 17 |
| 2 | 3 | 7 | 3 | 15 |
| 5 | 1 | 3 | 4 | 13 |
| 7 | 0 | 4 | 1 | 12 |
| 5 | 0 | 3 | 4 | 12 |
| 8 | 1 | 2 | 1 | 12 |
| 4 | 1 | 2 | 4 | 11 |
| 4 | 0 | 2 | 3 | 9 |
| 2 | 4 | 2 | 1 | 9 |
| 3 | 0 | 0 | 0 | 3 |

## 4. Build-up to tries

Possession of the ball that leads to tries is obtained from a number of sources - and they are listed above. More often than not, other actions - second phase, kicks and passes - then take place before the try is scored.

The table shows how many second phases preceded each try.

The table shows that 66\% of tries were preceded by not one second phase. Interestingly, not one of Kenya's tries contained a second
 phase.

The table shows the total number of passes that preceded each of the $\mathbf{2 5 3}$ tries.

The table shows that $64 \%$ of tries were preceded by 3 or fewer passes.

|  |  |  |
| :---: | :---: | :---: |
|  | 2007 | 2005 |
| No passes | 17 | $13 \%$ |
| 1 pass | 16 | 13 |
| 2 passes | 15 | 20 |
| p passes | 16 | 17 |
| 4 passes | 13 | 10 |
| 5 passes | 7 | 8 |
| 6 passes | 4 | 7 |
| 7 passes | 4 | 3 |
| 8 passes | 3 | 4 |
| + passes | 5 | 5 |
|  | $100 \%$ | $100 \%$ |

## BALL IN PLAY

The average amount of ball-in-play time was 7 minutes 04 seconds or $50 \%$ (2005-48\%).

The highest ball in play time was
Australia v USA and New Zealand v France both with 8 mins 50 secs (63\%)

The lowest ball in play time was Samoa v Uscotland with 5 mins 11 secs (37\%)

While the lowest possession time by any team in a game was Chile with 1 min 46 secs and the highest was France with 5 min 57 secs.

AVERAGE POSSESSION TIME
PER TEAM PER GAME
PER TEAM PER GAME
There was a considerable variation between the ball in play figures achieved by the various teams. This is shown in the following table which shows the average possession time achieved by each team throughout the tournament

As seen in the table, there were some noticeable differences between the participating teams. USA, for example, had almost twice the possession of West Indies.

|  | 2007 | 2006 |
| :---: | :---: | :---: |
| USA | 4m 28 | 3m 47 |
| France | 4m 07 | 3m 57 |
| Tonga | 3 m 58 | 3m 37 |
| England | 3m 52 | 4m 05 |
| Canada | 3 m 47 | 3m 15 |
| Australia | 3m 47 | 3m 46 |
| Portugal | 3 m 41 | n/a |
| South Africa | 3 m 34 | 2m 46 |
| Fiji | 3 m 33 | 2m 36 |
| New Zealand | 3m 29 | 3m 59 |
| Argentina | 3 m 27 | 2m 57 |
| Samoa | 3 m 23 | 4m18 |
| Scotland | 3 m 15 | 4m 20 |
| Kenya | 3 m 01 | 3m 08 |
| Chile | 2 m 53 | n/a |
| West Indies | 2m 35 | 2 m .20 |

The following table shows the percentage possession attained by each team in every game.

| NO. | TEAM | POSSESSION \% | TEAM | POSSESSION \% | SCORE |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | England | 55\% | Kenya | 45\% | 26-14 |
| 2 | Australia | 44\% | USA | 56\% | 29-14 |
| 3 | Fiji | 61\% | Scotland | 39\% | 57-5 |
| 4 | Argentina | 55\% | West Indies | 45\% | 31-0 |
| 5 | South Africa | 42\% | Portugal | 58\% | 33-0 |
| 6 | Samoa | 44\% | Tonga | 56\% | 22-10 |
| 7 | New Zealand | 45\% | Canada | 55\% | 31-19 |
| 8 | France | 63\% | Chile | 37\% | 28-5 |
| 9 | England | 41\% | USA | 59\% | 26-10 |
| 10 | Australia | 65\% | Kenya | 35\% | 12-21 |
| 11 | Fiji | 63\% | West Indies | 37\% | 55-7 |
| 12 | Argentina | 46\% | Scotland | 54\% | 12-17 |
| 13 | South Africa | 56\% | Tonga | 44\% | 19-0 |
| 14 | Samoa | 42\% | Portugal | 58\% | 29-14 |
| 15 | New Zealand | 72\% | Chile | 28\% | 43-5 |
| 16 | France | 53\% | Canada | 47\% | 21-5 |
| 17 | Kenya | 45\% | USA | 55\% | 5-33 |
| 18 | Scotland | 56\% | West Indies | 44\% | 31-5 |
| 19 | Portugal | 37\% | Tonga | 63\% | 5-31 |
| 20 | Canada | 51\% | Chile | 49\% | 17-19 |
| 21 | England | 53\% | Australia | 47\% | 14-19 |
| 22 | Fiji | 50\% | Argentina | 50\% | 19-5 |
| 23 | South Africa | 59\% | Samoa | 41\% | 14-21 |
| 24 | New Zealand | 34\% | France | 66\% | 26-0 |
| 25 | Argentina | 43\% | Portugal | 57\% | 17-10 |
| 26 | Chile | 44\% | Kenya | 56\% | 12-31 |
| 27 | Canada | 45\% | USA | 55\% | 14-7 |
| 28 | Tonga | 54\% | West Indies | 46\% | 22-5 |
| 29 | Fiji | 47\% | South Africa | 53\% | 26-21 |
| 30 | New Zealand | 36\% | England | 64\% | 19-7 |
| 31 | Australia | 50\% | France | 50\% | 7-10 |
| 32 | Samoa | 55\% | Scotland | 45\% | 34-0 |
| 33 | Portugal | 54\% | Chile | 46\% | 42-10 |
| 34 | USA | 60\% | West Indies | 40\% | 17-0 |
| 35 | Argentina | 61\% | Kenya | 39\% | 22-5 |
| 36 | Canada | 48\% | Tonga | 52\% | 10-24 |
| 37 | South Africa | 48\% | England | 52\% | 21-14 |
| 38 | Australia | 43\% | Scotland | 57\% | 7-17 |
| 39 | Fiji | 41\% | New Zealand | 59\% | 19-10 |
| 40 | France | 46\% | Samoa | 54\% | 0-38 |
| 41 | Portugal | 38\% | USA | 62\% | 5-26 |
| 42 | Argentina | 43\% | Tonga | 57\% | 17-22 |
| 43 | South Africa | 47\% | Scotland | 53\% | 28-19 |
| 44 | Fiji | 47\% | Samoa | 53\% | 38-24 |

The following table shows the number of matches when the team obtained more possession than their opposition. It can be seen that USA obtained more possession than their opponents in all of their 6 matches, while Chile did not obtain more possession in any of their 5.
nUMBER OF MATCHES WHERE MOST POSSESSION OBTAINED

## PASSING

The average number of passes per game was 68 (2006-66)
The most passes in a game was 104 (New Zealand v France)
The fewest passes in a game was 46 (Samoa v Scotland)
The team that passed most won on 20 occasions: the team that passed the least won on 21 occasions with three matches having the same number of passes. Conversely, USA out-passed their opponents in all 6 of theirs.

The average number of passes made by the participating teams showed major differences as shown in the following table:

AVERAGE NUMBER OF PASSES
PER TEAM PER GAME

|  |  | 2007 | 2006 |
| :--- | :--- | :---: | :---: |
|  |  | 51 | 37 |

The above table shows major differences between the various teams. USA made almost twice as many passes as Australia for example. Such differences can however partly be explained by the amount of possession obtained by each team. If this is taken into account, the rate at which each country passed the ball is far closer as shown in the next table. In the USA and Australia case, for example, while USA may have made almost double the passes, they only passed at a rate that was only $50 \%$ more.

This is shown in the following table which expresses passes as 'passes per minute possession '.

RATE OF PASSING PER TEAM
(PASSES PER MINUTE POSSESSION)

| West Indies |  | 2007 | 2006 |
| :---: | :---: | :---: | :---: |
|  |  | 11.4 | 8.7 |
| (0) | USA | 11.3 | 10.5 |
| 遃 | Canada | 10.5 | 10.8 |
| \% | New Zealand | 10.3 | 10.6 |
| (1) | Chile | 10.2 | n/a |
| 50] | Argentina | 10.1 | 8.6 |
| \% | South Africa | 10.0 | 6.1 |
| 7 | France | 9.9 | 10.2 |
| (0) | Scotland | 9.9 | 11.7 |
|  | England | 9.4 | 9.7 |
|  | Kenya | 9.4 | 9.8 |
| (HPM) | Portugal | 9.1 | n/a |
|  | Tonga | 9.0 | 9.7 |
| \% | Samoa | 8.9 | 10.9 |
| T) | Fiji | 8.6 | 9.1 |
| co | Australia | 7.3 | 10.1 |

As shown earlier, there were on average,68 passes per game. These passes came in passing sequences of which there were just over 1000.

Of these passing sequences

| 31\% comprised 1 pass | $2006-28 \%$ |
| :--- | :--- |
| 25\% comprised 2 passes | $2006-24 \%$ |
| 21\% comprised 3 passes | $2006-22 \%$ |
| 13\% comprised 4 passes | $2006-12 \%$ |
| 10\% comprised 5+ passes | $2006-14 \%$ |

Most teams fell into this profile - ie around $50+\%$ of their passing movements contained 2 or fewer passes. Where major differences arose, these were seen in the more lengthy passing movements. Certain teams were far more inclined to continue passing than others. This is shown in the following table which notes the number of $5+$ pass movements made by each country.

## PROPORTION OF 5+ PASSING SEQUENCES TO TOTAL NUMBER OF PASSING MOVEMENTS PER TEAM

|  |  | 2007 | 2006 |
| :---: | :---: | :---: | :---: |
| (0) | USA | 1 in 5 | 1 in 6 |
| $\pi$ | France | 1 in 6 | 1 in 4 |
| \& | New Zealand | 1 in 6 | 1 in 6 |
|  | West Indies | 1 in 6 | 1 in 17 |
| (0)! | Scotland | 1 in 7 | 1 in 4 |
| (1) | Chile | 1 in 8 | n/a |
| ( | Fiji | 1 in 8 | 1 in 8 |
| 4 ${ }^{\text {a }}$ | Canada | 1 in 9 | 1 in 7 |
| ( ${ }^{\text {big }}$ | Portugal | 1 in 9 | n/a |
| \% | South Africa | 1 in 9 | 1 in 12 |
|  | Argentina | 1 in 10 | 1 in 7 |
| 退 | England | 1 in 16 | 1 in 9 |
|  | Tonga | 1 in 19 | 1 in 8 |
|  | Samoa | 1 in 20 | 1 in 6 |
|  | Kenya | 1 in 28 | 1 in 8 |
| 0 | Australia | 1 in 68 | 1 in 9 |

During the course of the analysis an attempt was made to divide passes into 3 categories:

A Normal i.e. an orthodox pass from one player to another
B Off ground i.e. a successful pass by a player who has been brought to ground
C Pressure i.e. those passes made by a player under pressure. This would include an offload, any pass where an opponent made contact or was close enough to make the player pass the ball. It has to be said that this is a somewhat imprecise science and therefore the figures should be treated with a considerable degree of caution. At best they should only be regarded as possibly indicative.

Of all the passes made in the tournament,
66\% were regarded as Normal (2006-62\%)
7\% were Off ground (2006-7\%)
27\% were Pressure passes (2006-31\%)
All teams made more normal passes than ground or pressure. Australia made the most ground passes $-12 \%$ and England made the least - 3\%.

## RUCKS/MAULS

The average number of rucks/mauls ( $2^{\text {nd }}$ Phases) per game was 18 (2006-14)
There were however noticeable differences from match to match:
The most rucks/mauls in a game was 28 (Canada v Tonga, Australia v USA)
The fewest in a game was 7 (Fiji v West Indies \& Scotland v West Indies)

In the 44 matches, the team that rucked the most won on 15 occasions: the team that rucked the least won on 29 occasions.

Canada outrucked their opponents in all five of their matches.

The number of rucks/mauls created by the participating teams showed major differences as shown in the attached table:

AVERAGE NUMBER OF RUCKS/MAULS PER TEAM PER GAME

|  |  | 2007 | 2006 |
| :---: | :---: | :---: | :---: |
| $3$ | Tonga | 14 | 8 |
| 筧 | England | 13 | 10 |
| 5 | Australia | 13 | 9 |
| \% | Canada | 13 | 8 |
| (2) | USA | 10 | 9 |
|  | Portugal | 10 | n/a |
| 部 | Samoa | 9 | 10 |
| ( ARE | Argentina | 9 | 5 |
| T | France | 8 | 5 |
|  | Kenya | 7 | 5 |
| e | New Zealand | 7 | 7 |
| (3) | Scotland | 7 | 8 |
| 92 | South Africa | 7 | 4 |
| (T) | Fiji | 7 | 3 |
| (1) | Chile | 6 | n/a |
| 2. | West Indies | 6 | 7 |

The table shows major differences between the various teams. Tonga, for example, rucked twice as much as Fiji. Again, some of the differences can be explained by the amount of possession obtained by each team. If this is taken into account, the rate at which each country rucked and mauled is far closer, as shown in the next table. This expresses rucks/mauls as 'rucks/mauls per minute possession ':

RATE OF RUCKS/MAULS PER TEAM
(RUCKS \& MAULS PER MINUTE POSSESSION)

|  |  | 2007 | 2006 |
| :---: | :---: | :---: | :---: |
|  | Canada | 3.5 | 2.6 |
|  | Tonga | 3.5 | 2.1 |
| 骨 | England | 3.3 | 2.5 |
| - | Australia | 3.3 | 2.4 |
| ( | Portugal | 2.7 | n/a |
| a | Argentina | 2.6 | 1.6 |
| 軎 | Samoa | 2.6 | 2.4 |
| 2 | West Indies | 2.3 | 2.8 |
|  | Kenya | 2.2 | 1.6 |
| (4) | Chile | 2.1 | n/a |
| ,035 | Scotland | 2.1 | 1.8 |
| P | New Zealand | 2.1 | 1.7 |
| 0 | USA | 2.1 | 2.6 |
| T) | France | 2.0 | 1.3 |
| 9 | South Africa | 2.0 | 1.4 |
| (1) | Fiji | 1.9 | 1.2 |

Retention of possession at the breakdown
At the breakdown, the team taking in the ball retained possession by either winning the ball or being awarded a penalty on $80 \%$ of occasions. The percentage success rate of each team was as follows:

BREAKDOWN RETENTION SUCCESS (\%)

## KICKS

AVERAGE NUMBER OF KICKS
PER TEAM PER GAME
The average number of kicks per game was 10 - or around 5 when penalty kicks and free kicks are excluded. These four comprised kicks ahead, kicks to touch at the end of a half and assorted kicks both defensive and desperate. In numerical terms therefore, kicks played a relatively small role in the San Diego tournament.

Argentina kicked more often than any other team. New Zealand and Australia, on the other hand, kicked very little.

In 2 of the 44 matches, neither team made a single kick. This contrasts with the Fiji v South Africa game in which there were12.

Of the total kicks made by teams in open play, the attached table shows how many were regained. The overall regained total was 56 out of 239

|  |  | KICKS MADE | KICKS RETAINED |
| :---: | :---: | :---: | :---: |
|  | Argentina | 36 | 9 |
|  | Chile | 26 | 6 |
|  | Kenya | 23 | 5 |
| (8) | Scotland | 21 | 6 |
| T | Fiji | 19 | 4 |
| \% | Tonga | 17 | 6 |
| 9 | South Africa | 15 | 3 |
| (1) | Samoa | 13 | 5 |
| (1) | France | 13 | 1 |
|  | West Indies | 11 | 3 |
| (6) | USA | 11 | 2 |
| 縎 | England | 8 | 1 |
| (1) | Portugal | 8 | 2 |
| * | Canada | 7 | 1 |
|  | Australia | 6 | 1 |
| $\otimes$ | New Zealand | 5 | 1 | or $23 \%$

## TACKLES

Tackles have been divided into 3 categories:
Single this is where one player attempts to bring an opponent to the ground
Team which is where more than one player makes the tackle Offload which is where a player commits himself to a tackle but his opponent manages to offload the ball

Of all the tackles made: $\quad \mathbf{2 9 \%}$ were Single Tackles
14\% were Team tackles
57\% were Offload tackles
100\%

There were some 42 tackles per game or 21 per team. Around this figure however there were major variations. While, for example, Samoa made 141 in 6 matches, and USA made 131 in their 6 matches, England made just 73 in their 6 .

Such differences between the teams are illustrated in the following table which gives the average number of tackles per team per game:

AVERAGE NUMBER OF TACKLES PER TEAM PER GAME

|  | New Zealand Kenya | 2007 | 2006 |
| :---: | :---: | :---: | :---: |
|  |  | 26 | 14 |
|  |  | 24 | 25 |
| C゙5 | Australia | 24 | 21 |
| \% | Samoa | 24 | 19 |
| To | Fiji | 23 | 24 |
| ci* | Canada | 22 | 23 |
|  | Portugal | 22 | n/a |
| (5) | USA | 22 | 16 |
|  | Argentina | 21 | 22 |
| 7 | France | 21 | 21 |
| \% ${ }^{3}$ | South Africa | 21 | 31 |
|  | Chile | 20 | n/a |
|  | Tonga | 18 | 20 |
|  | West Indies | 16 | 22 |
| (8) | Scotland | 16 | 13 |
|  | England | 15 | 12 |

In addition to clear differences in the overall number of tackles made by each team, there were also differences in the sorts of tackles that were made. With regard to team tackles, for example, while these accounted for around $14 \%$ of all tackles, in England' case the figure was 27\% while Fiji's was 9\%. The full list is as follows:

TACKLE TYPE PER TEAM (\%)

| 47\% | 67\% | 27\% | 14\% | 26\% | 19\% |

## BREAKDOWN

There are over 500 breakdowns in a tournament - and a breakdown occurs when at least one player from each side is on his feet at or over the ball. When the tackler is on his feet and an opponent joins in, then there is a breakdown. When the tackler is not on his feet, a breakdown occurs when at least one player from each side joins in.

What became immediately noticeable was that there were clear differences in the approach of the various countries in committing players to the breakdown. While certain teams frequently committed few additional players, other countries consistently committed more.

France's approach to the breakdown for example was quite different from Kenya. In attack for example, Kenya would seldom send in more than one player while France, on the other hand, would send in more than one on two out of three occasions.

The extent of the differences between each team's approach is illustrated by an exercise that looked at how many players were committed to the breakdown (1) in attack and (2) in defence.

NUMBER OF PLAYERS COMMITTED TO BREAKDOWN - ATTACK

|  |  | $\begin{gathered} 1 \text { PLAYER } \\ 2007 \\ \hline \end{gathered}$ | $\begin{gathered} 1 \text { PLAYER } \\ 2006 \end{gathered}$ | $\begin{gathered} 2+ \\ \text { PLAYERS } \\ 2007 \\ \hline \end{gathered}$ | 2+ PLAYERS 2006 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| , 94\% | Kenya | 82\% | 81\% | 18\% | 19\% |
| ( ${ }^{\text {c }}$ | Samoa | 81\% | 94\% | 19\% | 6\% |
|  | Fiji | 70\% | 80\% | 30\% | 20\% |
| 9 ${ }^{\text {s }}$ | South Africa | 69\% | 70\% | 31\% | 30\% |
| $0$ | Tonga | 66\% | 76\% | 34\% | 24\% |
| $\square$ | New Zealand | 65\% | 94\% | 35\% | 6\% |
| (0) | USA | 65\% | 64\% | 35\% | 33\% |
| OTR | Argentina | 61\% | 79\% | 39\% | 21\% |
| + | Canada | 58\% | 81\% | 42\% | 19\% |
| 1 | Chile | 57\% | n/a | 43\% | n/a |
| 3 | Australia | 57\% | 58\% | 43\% | 42\% |
| (\%) | Portugal | 55\% | n/a | 45\% | n/a |
|  | England | 51\% | 55\% | 49\% | 45\% |
|  | West Indies | 50\% | 45\% | 50\% | 55\% |
| (6) | Scotland | 41\% | 68\% | 59\% | 32\% |
| $7$ | France | 29\% | 48\% | 71\% | 52\% |

What was also noticeable was how few $2^{\text {nd }}$ phases were created by certain teams compared with others. A comparison of past IRB Sevens winners illustrates the extent of the differences:
$2^{\text {nd }}$ phases created
40 in 6 games - av 6.6
41 in 5 games - av 8.2
42 in 6 games inc. final- av 7.0
37 in 5 games inc final- av 7.4
64 in 5 games - av 12.8

There were also noticeable differences regarding the number of players committed at defensive breakdowns. Scotland, Kenya and South Africa's approach was quite different from Australia, Argentina and Tonga when defending the second phase as seen in the following table. Whereas the first group would frequently not send in an additional player, the latter group did in the vast majority of cases.

NUMBER OF PLAYERS COMMITTED TO BREAKDOWN - DEFENCE

Scotland
Kenya
South Africa
New Zealand
USA
Fiji
West Indies
Samoa
Portugal
Canada
France
Chile

| 26\% | 37\% | 52\% | 54\% | 22\% | 9\% |
| 26\% | 23\% | 57\% | 46\% | 17\% | 31\% |
| 25\% | 10\% | 51\% | 65\% | 24\% | 25\% |
| 20\% | n/a | 57\% | n/a | 23\% | n/a |
| 20\% | 19\% | 56\% | 53\% | 24\% | 28\% |
| 15\% | 26\% | 58\% | 60\% | 27\% | 14\% |
| 13\% | n/a | 64\% | n/a | 23\% | n/a |
| 13\% | 8\% | 54\% | 56\% | 33\% | 36\% |
| 12\% | 20\% | 53\% | 53\% | 35\% | 27\% |
| 12\% | 23\% | 63\% | 58\% | 25\% | 19\% |
| 10\% | 20\% | 68\% | 66\% | 22\% | 14\% |

## SCRUMS

| Penalties | 7 against putting in team: 12 against opponents |
| :---: | :---: |
| Crooked feeds penalised | 3 |
| Scrums against the head | 1 in 11 |

Portugal and England were the only teams that won all their scrums. Tonga and Kenya each won 3 tight heads, South Africa and Fiji each won 2 - the remaining 12 teams won 1 or none. While, Chile lost 4 of their 9 scrums and only 5 teams never won an opposition scrum.

## LINEOUTS

| Most in a gameLeast in a game | 6(Argentina v Tonga, Fiji v <br> South Africa) |
| :---: | :---: |
|  | $\begin{gathered} 0 \\ (6 \text { matches) } \end{gathered}$ |
| Possession retained by putting in team | 77\% |
| Percentage contested | 55\% |

Samoa's opponents had only one lineout in total. Argentina's opponents had 11.

Although there were relatively few lineout throws per team, only 4 teams never lost a lineout. (England, Fiji, New Zealand and Canada). Portugal and Canada had only two lineout throw-ins in the entire tournament.

There were 4 lineout steals by Argentina and 4 by Canada. Two other teams managed 2 each - the remainder managed 1 or none.

## RESTARTS

Restarts were classified into 2 sorts, long and short. A short restart was one that was contestable: a long one was not.

18\% of restarts were kicked long (2006-28\%)
82\% were kicked short (2006-72\%)
Of all restarts, the kicking team won $\mathbf{2 4 \%}$ or 1 in 4 (2006-24\% or 1 in 4). There were 33 restart errors. The most successful teams were Samoa, Kenya, Portugal, and West Indies who had no restart errors in 25,13, 14 and 3 short starts respectively.

RESTART RETENTION RATES PER TEAM

Fiji

| LONG RESTART | SHORT RESTART | RESTART REGAINED 2007 | RESTART REGAINED 2006 |
| :---: | :---: | :---: | :---: |
| 7 | 26 | 1 in 2 | 1 in 23 |
| 1 | 21 | 1 in 3 | 1in 6 |
| 2 | 14 | 1 in 4 | n/a |
| 1 | 25 | 1 in 4 | 1 in 2 |
| 4 | 18 | 1 in 4 | 1 in 3 |
| 4 | 13 | 1 in 4 | 1 in 18 |
| 2 | 13 | 1 in 5 | 1 in 2 |
| none | 19 | 1 in 6 | 1 in 19 |
| 3 | 9 | 1 in 6 | n/a |
| 2 | 12 | 1 in 7 | 1 in 5 |
| 2 | 12 | 1 in 7 | 1 in 3 |
| 2 | 12 | 1 in 7 | 1 in 2 |
| 4 | 14 | 1 in 9 | 1 in 3 |
| 7 | 16 | 1 in 12 | 1 in 2 |
| 7 | 16 | 1 in 12 | 1 in 5 |
| 4 | 3 | none | 0 in 7 |

Lack of success at the restart is not always the result of ansuccessful challenge. Certain teams can intentionally kick long on more occasions than others. Retention rates at restarts varied, with some teams retaining their own restarts noticeably more successfully than others as shown in the following table:

## PENALTIES

The average number of penalties per game was 7 (2006-7)
The most in a game was 14 (Portugal v Tonga)
The fewest in a game was 1 (Scotland v West Indies, Fiji v West Indies)
Of the penalties and free kicks awarded:
$54 \%$ were at the breakdown (ruck/tackle)
$5 \%$ were at the scrum
$11 \%$ were faulty restarts
$10 \%$ were for offside
$6 \%$ were for illegal tackles
$6 \%$ were +10 m
$4 \%$ were for obstruction
$0 \%$ for lineout offences
$3 \%$ miscellaneous
$1 \%$ for foul play
$100 \%$

With regard to the total number of penalties conceded by each team, the following table has been split into two in order to reflect the fact that some teams played 6 matches and others 5 :

TOTAL NUMBER OF PENALTIES CONCEDED PER TEAM

|  | Kenya | MATCHES | PENS | 18 | Scotland | MATCHES | PENS |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 5 | 11 |  |  | 6 | 11 |
|  | West Indies | 5 | 13 | (1) | USA | 6 | 16 |
| (1) | Chile | 5 | 15 | T | Fiji | 6 | 16 |
| * | Canada | 5 | 16 | (6) | Samoa | 6 | 18 |
| * | New Zealand | 5 | 19 | 践 | Portugal | 6 | 21 |
| 动 | England | 5 | 21 |  | Tonga | 6 | 24 |
| $\underset{H \in \mathbb{R}}{\substack{T}}$ | France | 5 | 22 | \% | South Africa | 6 | 25 |
|  | Australia | 5 | 28 | 50 | Argentina | 6 | 31 |

What needs to be noted however is that such figures are absolute and do not necessarily reflect the true degree of discipline or ill-discipline of a particular team. The number of penalties can, for example, vary from match to match. Some referees penalise more than others (in one game, there were 14 penalties and free kicks - in another, there were none). A better and probably more accurate indicator, therefore, is the proportion of penalties conceded by a team in all their matches compared with their opponents. This can be seen in the following table. Using Scotland as an example, out of 33 penalties awarded in matches, only 11 or $33 \%$ went against them.

TOTAL NUMBER OF PENALTIES FOR \& AGAINST PER TEAM

|  | Scotland <br> Kenya <br> USA | $\underset{\text { FOR }}{\text { PENALTIES }}$ | PENALTIES AGAINST |
| :---: | :---: | :---: | :---: |
|  |  | 22 | 11 |
|  |  | 21 | 11 |
|  |  | 27 | 16 |
| \% | Canada | 22 | 16 |
| 暑 | England | 24 | 21 |
| $\cdots$ | Portugal | 25 | 21 |
|  | Fiji | 19 | 16 |
| ) | Samoa | 19 | 18 |
| $0$ | Tonga | 25 | 24 |
| 1 | Chile | 13 | 15 |
|  | West Indies | 8 | 13 |
|  | South Africa | 19 | 25 |
| ) | France | 15 | 22 |
| \% | New Zealand | 12 | 19 |
|  | Australia | 17 | 28 |
| O | Argentina | 19 | 31 |

With regard to penalties awarded at the breakdown, the team in possession was penalised $10 \%$ less than their opponents. Certain countries, however, show a different pattern as shown in the following table:

TOTAL NUMBER OF PENALTIES FOR \& AGAINST ATTACK
AT BREAKDOWN PER TEAM

The average number of penalties awarded by the 8 participating referees was as follows:

|  | PENALTIES PER GAME | YELLOW/ RED CARDS |
| :---: | :---: | :---: |
| Smith | 8.8 | $3+1$ red |
| Pilara | 7.4 | 1 |
| Mafi | 7.2 | 3 |
| Stanish | 7.2 | 3 |
| Teagarden | 6.8 | 1 |
| Lloyd-Jones | 6.4 | 1 |
| Hirabayashi | 6.3 | 3 |
| Bullen | 5.8 | 1 |
|  |  | 16 +1 red |

Of all penalties and free kicks awarded, 32\% went against the team in possession of the ball. The range varied noticeably between the 8 referees however. One referee penalised the team in possession on only $18 \%$ of occasions while another penalised them on 44\% of occasions.

## TEMPORARY SUSPENSIONS (Red/Yellow cards)

There were 16 yellow cards issued - with one red cards. This contrasts with 13 yellow cards and no red cards in 2005.

The offences for which they were awarded were as follows:

|  | YELLOW CARDS | RED CARD |
| :---: | :---: | :---: |
| THROWING BALL AWAY |  |  |
| ILLEGAL TACKLES | 6 |  |
| RUCK OFFENCES | 5 |  |
| TIME WASTING | 1 |  |
| PLAYING OPP W/OUT BALL | 1 | 1 |
| FOUL PLAY | 1 | 1 |
|  | 1 | 1 |
|  | 1 | 1 |

This year, 7 of the 16 teams did not concede a card (New Zealand, West Indies, USA, Canada, Samoa, Kenya and France)
